# About Me

---

**I am Quang Minh.**

I'm a K22 student with a major in information

technology at Hanoi Capital University. As a person, I lean towards the quieter side and prefer not to overtly display my emotions. Describing myself as an introvert, I am someone who always considers the well-being of those around me. When it comes to my academic pursuits, I am known for being active in exploring and learning from my peers. Engaging in school activities is a significant part of my routine, as I believe these experiences play a crucial role in shaping my character and skills. Looking ahead, I am determined to achieve a lot in my future endeavors, especially in the professional path that I am working towards.
